

# InvestmentView

OVER THE LAST WEEK  
AS OF JULY 25, 2025

## QUICK TAKE

**+** Market breadth has been strong as the NYSE Stock only advance-decline line reached all-time highs last week. Broad market participation is a positive sign for equities.

**+** Market RISK remains low as both expected equity and bond market volatility, as measured by the VIX and MOVE indexes respectively, are well below their long-term averages.

**-** Elevated equity market valuations, particularly within a higher interest rate environment are reasons for caution within the long-term model.

## A Closer Look at Our Tactical Positioning Targets

Each day, Meeder analyzes and ranks over 70 different factors from our short, intermediate, and long-term models. The dynamic statistical model incorporates factors covering macroeconomic, fundamental, trends and technical analysis to estimate the potential reward and marketplace risk of the equity markets. The Meeder Spectrum, Muirfield, Balanced, Moderate Allocation, and Conservative Allocation funds utilize this strategy for the Defensive Equity portion of their portfolios. The Defensive Equity Strategy guides the allocation of each fund's equity sleeve and the actual proportion of equity investments in any fund will vary depending on the investment objectives of the fund.

### DEFENSIVE EQUITY SNAPSHOT

### UNDERSTANDING THE DEFENSIVE EQUITY SNAPSHOT

The vertical axis of the grid combines the scores of our long-, intermediate-, and short-term models to arrive at the reward value for the stock market. The horizontal axis represents the model's internal measure of stock market risk. The reward value is divided by marketplace risk to arrive at our recommended percentage of Net Equity Exposure.

Asset allocation and diversification do not assure a profit or protect against loss. All investments carry a certain amount of risk and there is no guarantee that any strategy will achieve its investment objective. Risks of investment in Meeder Funds include foreign and emerging markets securities risks, derivative and short selling risks, credit and quantitative asset allocation risk.

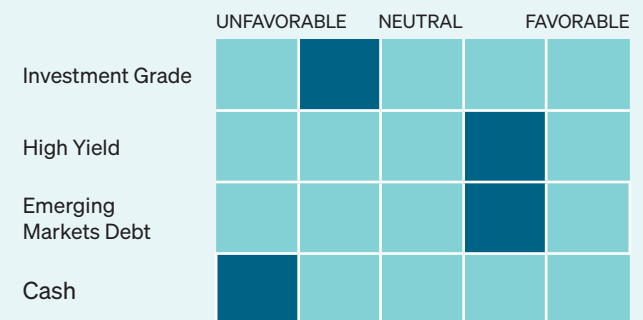

Meeder Funds are distributed by Meeder Distribution Services, Inc. An affiliated investment adviser, Meeder Asset Management, services as the investment adviser to Meeder Funds.

# MEEDER FIXED INCOME STRATEGY

## Quick Take

- » We are overweight high yield relative to investment grade.
- » We are overweight emerging market debt.
- » We have reduced our duration and are now shorter than our benchmarks.

## Fixed Income Preferences

## Average Duration

The Meeder Fixed Income strategy allocates the fixed income component of our Meeder Dynamic Allocation, Global Allocation, Balanced, Moderate Allocation, and Conservative Allocation Fund between investment-grade bonds, high-yield corporate bonds and international debt. Employing a multi-factor model, the strategy covers both asset class and duration of fixed income securities held by the funds.
