OVER THE LAST WEEK
AS OF JANUARY 10, 2025

QUICK TAKE

REWARD is slightly outpacing RISK. RISK remains muted as both equity and bond market volatility measures, the VIX and MOVE indexes, respectively, are below their long-term averages

The intermediate-term model is positive as bearish newsletter sentiment and fund flows are contributing from a contrarian perspective.

The long-term model is negative as elevated valuations and interest rates continue to weigh on the model.

A Closer Look at Our Tactical Positioning Targets

Each day, Meeder analyzes and ranks over 70 different factors from our short, intermediate, and long-term models. The dynamic statistical model incorporates factors covering macroeconomic, fundamental, trends and technical analysis to estimate the potential reward and marketplace risk of the equity markets. The Meeder Spectrum, Muirfield, Balanced, Moderate Allocation, and Conservative Allocation funds utilize this strategy for the Defensive Equity portion of their portfolios. The Defensive Equity Strategy guides the allocation of each fund's equity sleeve and the actual proportion of equity investments in any fund will vary depending on the investment objectives of the fund.

DEFENSIVE EQUITY SNAPSHOT

Fully Invested (More Favorable) Fully Defensive (Less Favorable)

DEFENSIVE EQUITY ALLOCATION

UNDERSTANDING THE DEFENSIVE EQUITY SNAPSHOT

The vertical axis of the grid combines the scores of our long-, intermediate-, and short-term models to arrive at the reward value for the stock market. The horizontal axis represents the model's internal measure of stock market risk. The reward value is divided by marketplace risk to arrive at our recommended percentage of Net Equity Exposure.

Quick Take

- » We remain overweight high yield relative to investment grade as the Fed's easing cycle has begun and the economy continues to grow.
- » We are underweight emerging market debt as the US dollar continues to strengthen.
- » We have shortened our duration to 4.2 years as rates continue to rise and inflation remains stubborn.

Asset allocation and diversification do not assure a profit or protect against loss. All investments carry a certain amount of risk and there is no guarantee that any strategy will achieve its investment objective. Risks of investment in Meeder Funds include foreign and emerging markets securities risks, derivative and short selling risks, credit and quantitative asset allocation risk.

Meeder Funds are distributed by Meeder Distribution Services, Inc. An affiliated investment adviser, Meeder Asset Management, services as the investment adviser to Meeder Funds.

The Meeder Fixed Income strategy allocates the fixed income component of our Meeder Dynamic Allocation, Global Allocation, Balanced, Moderate Allocation, and Conservative Allocation Fund between investment-grade bonds, high-yield corporate bonds and international debt. Employing a multi-factor model, the strategy covers both asset class and duration of fixed income securities held by the funds.
