OVER THE LAST WEEK
AS OF JUNE 7, 2024

QUICK TAKE

Two asymmetric signals turned on over the previous month related to strong market breadth and a surge in inverse ETF flows. These signals partnered with all trend and momentum signals being positive has resulted in a very strong short-term model.

Market RISK continues to remain low. Expected equity market volatility is near 5-year lows and expected interest rate volatility is near average levels.

The intermediate-term model has moved into neutral territory as bullish investor surveys are competing with bearish fund flow activity, both of which are viewed from a contrarian standpoint.

MARKET RISK

A Closer Look at Our Tactical Positioning Targets

Each day, Meeder analyzes and ranks over 70 different factors from our short, intermediate, and long-term models. The dynamic statistical model incorporates factors covering macroeconomic, fundamental, trends and technical analysis to estimate the potential reward and marketplace risk of the equity markets. The Meeder Spectrum, Muirfield, Balanced, Moderate Allocation, and Conservative Allocation funds utilize this strategy for the Defensive Equity portion of their portfolios. The Defensive Equity Strategy guides the allocation of each fund's equity sleeve and the actual proportion of equity investments in any fund will vary depending on the investment objectives of the fund.

DEFENSIVE EQUITY SNAPSHOT

DEFENSIVE EQUITY ALLOCATION

UNDERSTANDING THE DEFENSIVE EQUITY SNAPSHOT

The vertical axis of the grid combines the scores of our long-, intermediate-, and short-term models to arrive at the reward value for the stock market. The horizontal axis represents the model's internal measure of stock market risk. The reward value is divided by marketplace risk to arrive at our recommended percentage of Net Equity Exposure.

Asset allocation and diversification do not assure a profit or protect against loss. All investments carry a certain amount of risk and there is no guarantee that any strategy will achieve its investment objective. Risks of investment in Meeder Funds include foreign and emerging markets securities risks, derivative and short selling risks, credit and quantitative asset allocation risk.

Meeder Funds are distributed by Meeder Distribution Services, Inc. An affiliated investment adviser, Meeder Asset Management, services as the investment adviser to Meeder Funds.

MEEDER FIXED INCOME STRATEGY

Quick Take

- » We remain overweight high yield relative to investment grade as the outlook for rate cuts has been pushed out. We prefer the carry (yield) on high yield as the potential for capital appreciation in higher quality debt is currently limited in our view.
- » We are overweight emerging market debt due to increased momentum in the sector and reduced market volatility.
- » We remain duration neutral as the path of interest rates remains in doubt. Much uncertainty remains as the probability of a rate cut in September hovers around 50%.

Fixed Income Preferences

Average Duration

The Meeder Fixed Income strategy allocates the fixed income component of our Meeder Dynamic Allocation, Global Allocation, Balanced, Moderate Allocation, and Conservative Allocation Fund between investment-grade bonds, high-yield corporate bonds and international debt. Employing a multi-factor model, the strategy covers both asset class and duration of fixed income securities held by the funds.
